| <p>Výsledok zápasu odzrkadľuje dianie na ihrisku. Počas celého duelu sme boli jasne lepším družstvom. Do prvého gólu sme sa trápili v koncovke, po ňom sme predviedli zopár pekných kombinačných akcií. Nemôžem byť spokojný s herným prejavom v druhom polčase. Hráči prestali hrať na 2-3 dotyky, komplikovane realizovali finálnu fázu a nepremenili veľké množstvo príležitostí. Pozitívom je vysoké víťazstvo, negatívom kolísavé výkony hráčov v jednotlivých časových úsekoch počas zápasu.</p> |                               |                                                                                                                                      |             |                                          |          |                                                                                                                                                          |                                                                                                   |                                                                                         |         |                                            |        |     |     |                                                                                                   |                                                                                                |         |        |     |     |      |                                                                                                             |     |         |     |     |           |                                                                                                                                                                                                                                                                                                                                                                           |  |  |      |  |  |      |     |         |     |     |      |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                   |  |       |  |  |       |     |      |    |     |           |    |     |      |  |  |  |  |  |  |  |  |  |  |  |  |
